

I am expressing my wish that you not expand the use of Low Power FM, as this would adversely effect translator stations such as K-Love. As a non-profit, listener run program K-love has a huge impact on myself as well as my community. Their programming is positive and encouraging in it's content. I am helped daily by their upliftin music, encouraging words, and prayer for our communities and the nation.

They also have free phone in counseling services for those in need, they provide a format for non-profit charitable organizations to get the word out about their efforts to help the poor etc.

Local programs such as Fresno Rescue mission benefit from the services provided by K-LOVE radio as well as national organizations such as "Feed the Hungry" etc.

I feel giving priority to LPFM would adversely effect not only mself, but also my community, it's residences and many local programs. Thank you for listening to my concerns.

Sincerely

Jack Shafer
